

# Kuhl Crew Summer Camp

We're excited to announce that **2026 Kuhl Crew Summer Camp** is officially open for enrollment! Our summer calendar is full of engaging, hands-on experiences. We've curated a lineup of incredible onsite guests and special events to bring the world to us. As in recent years, our adventures will take place right here on campus, complemented by dynamic virtual field trips and special onsite guests who will bring new learning opportunities directly to our campers.

## What's in store this summer:

- **Create:** Weekly open-ended STEM Maker Spaces and hands-on cooking projects.
- **Celebrate:** Our signature "Fun Fridays."
- **Explore:** Experiences ranging from animal science to mechanics to global art.
- **Wander:** Virtual journeys to the Metropolitan Museum of Art, and NASA's Chandra Observatory
- **Connect:** Weekly rally songs, team-building and community-focused service projects.

Each week is intentionally designed to promote creativity, collaboration, and curiosity.

Alongside our adventures, we will incorporate meaningful opportunities to practice teamwork, empathy, and community-minded thinking. Campers will prioritize well-being by integrating age-appropriate self-care practices that support emotional awareness and mental well-being into our daily rhythm.

Check out the summer calendar for the full schedule.

Above all, Summer 2026 will be filled with connection, discovery, growth — and plenty of fun.

We look forward to an incredible season with our Kuhl Crew Campers!

To enroll: Follow the Summer Camp Enrollment link on our website or scan the QR code.
